Projects

Portfolio Demo: [Portfolio](#)

Quiz Application

- Developed a comprehensive quiz application using React and Tailwind and ReduxToolkit to help users create, manage, and take quizzes efficiently.

Project Demo: [Quiz Application](#)

Hotel Management System

The hotel reservation system project aims to create a comprehensive platform that allows customers to book hotel rooms online efficiently. The system will enable users to search for available rooms, select dates, specify the number of people, and view photos of the rooms before making a reservation. The project will be built using React, Redux, and Material UI to ensure a modern and responsive user interface..

Project Demo: [Hotel Management System](#)
